

Ozark Fire District Media Release

Back to it again in the first few months of 2023. We are extremely excited to announce 6 Firefighters from an early 2022 hiring process will be closing out their 12-month probationary period. These members have pushed through a rigorous 12-month probationary process where they have learned basic skills of the Ozark Fire Protection District and become proficient at life-saving measures to become excellent at emergency service delivery.

To say we are proud of their accomplishments would be an understatement. They have all overcome battles to become professional Firefighters you see today. Please join us as we welcome them to the full-time staff of the Ozark Fire Protection District Team.

Ozark Fire District Media Release

In other news, the district has closed out the 2022 year with just under 3,987 calls for service, approximately 11 calls per day on average. 68 of those calls for building fires alone. Crews train daily to provide the services demanded by our citizens. We are privileged to be a small part of this buddy community and look forward to what 2023 has in store.

As always we want everyone to remain fire safe in all they do. February is the perfect time to

Respectfully;

Aaron S. Heaton

Assistant Chief
